

## 140,000 TPY HDPE PLANT FOR SALE

**Capacity:**

140,000 TPY  
(70,000 TPY x 2)

**Major Equipment**

Polymerization reactors  
Centrifuges  
Fluidized bed dryers  
Extruders  
Packaging lines

### BRIEF PLANT DESCRIPTION

The plant has two identical production lines. Each line can produce 70,000 TPY. Each line has two polymerization reactors. Two of the four reactors were built and installed in 2006. In 2004 and 2006, the plant installed new centrifuges (8 ton/hour) and fluidized bed dryers (2 stages). The plant is equipped with two full lines of extrusion and packing. Different grades of products can be produced with easy setting adjustment. Complete documents are available as well as possible technical assistance of installation and start-up
